- Main features:
  - Created new routing for 6 new components
    - register-bottom(.cs,.html,.ts)
    - register-left(.cs,.html,.ts)
    - register-top(.cs,.html,.ts)
    - sign-in-buttons(.cs,.html,.ts)
    - sign-in-bottom(.cs,.html,.ts)
    - sign-in-top(.cs,.html,.ts)
  - These were routed through
    - RegisterLayout
    - sign-in-layout
- Bonus: None to report, this one took longer than expected

Comment: My routing for the reister components did not work, so I had to route them through sign in to test and show what I completed. I ran into this Monday night, so I had to do what I had to do. I will go to office hours to fix the routing
